

CHRIS “WOODY” WOODRUFF

Principal Architect · Enterprise AI Systems & Cloud Platform Leadership

Grand Rapids, MI · 616.724.6885 · cwoodruff@live.com · woodruff.dev · linkedin.com/in/chriswoodruff · github.com/cwoodruff

EXECUTIVE PROFILE

Principal architect and platform leader with 15+ years driving enterprise modernization across regulated healthcare, financial services, and consumer platforms. Track record of converting legacy infrastructure into reliable, cost-efficient systems—delivering **35% infrastructure cost reductions**, eliminating cascading-failure risk, and sustaining **four-nines availability under load**. Currently architecting agentic AI systems for federal healthcare while serving as **Microsoft MVP** and **.NET Foundation Board Director**.

SELECTED EXECUTIVE IMPACT

- **Cut Azure infrastructure spend 35%** on a 500K+ daily-transaction platform while sustaining a 99.9% uptime SLA—reinvesting savings into product capacity.
- **Eliminated cascading-failure risk** for a top-3 US mortgage originator’s core platform; raised availability from 95% to 99.8% and reduced incident-driven revenue exposure.
- **Architected systems serving 1M+ concurrent users at 99.99% availability** across Microsoft, MLB Advanced Media, and 10+ Fortune 500 engagements.
- **Cut new-engineer ramp 42%** (6 → 3.5 weeks) by standing up the Developer Relations function and internal platform tooling at Rocket Mortgage—materially expanding engineering capacity for a 200+ developer org.
- **Reduced stockouts 60% and excess inventory 25%** on a \$10M/day cloud inventory platform, directly improving working-capital efficiency.

LEADERSHIP DOMAINS

Enterprise & AI Architecture — Agentic system design · multi-agent orchestration · eval harness & guardrail engineering · domain-driven design · event-driven and modular-monolith architecture

Cloud Platform Modernization — Azure, AWS, GCP · Kubernetes · Infrastructure-as-Code · multi-cloud strategy · legacy-to-cloud migration · cost governance

Reliability & Risk Engineering — SLA/SLO ownership · disaster recovery · circuit breakers & failover · incident command · regulated-healthcare compliance posture

Engineering Leadership — Architecture review boards · distributed-team org design · technical mentoring at scale · executive and board-level communication

PROFESSIONAL EXPERIENCE

TEKsystems — Senior Solution Architect, Federal Healthcare

Dec 2025 – Present

Engagement at one of the nation’s largest healthcare technology companies, supporting a military health readiness platform spanning clinical document pipelines, AI-assisted pre-fill, and Azure Purple Tenant infrastructure.

- Setting enterprise architecture standards and reliability patterns—redundancy, failover, business continuity—for a regulated, mission-critical federal healthcare platform.
- Advising delivery leadership on clean architecture and scalable design choices for development teams operating at national scale.

Woody Technology Studio LLC — Founder, Agentic AI Practice

Dec 2025 – Present

Independent advisory practice focused on agentic AI systems for regulated and enterprise environments.

- **Agentic system design.** End-to-end systems—agent specifications, multi-agent task decomposition, context architecture—for healthcare workflows where verifiability and blast-radius control are non-negotiable.
- **AI reliability and trust.** Guardrails and human-in-the-loop boundaries that surface specification drift, context degradation, and silent failure modes before they reach production.
- **Quality upstream of delivery.** Evaluation harnesses that move quality judgment ahead of the release line, preventing AI-introduced defects from compounding across enterprise pipelines.
- **AI economics.** Token-cost modeling, frontier-vs-commodity model trade-offs, and ROI justification for enterprise AI investment—applying cloud cost-governance discipline to AI spend.

Real Time Technologies, Inc. — Senior Solution Architect

Dec 2023 – Nov 2025

Architected and delivered a multi-tenant Azure platform serving 50+ REST endpoints under a Modular Monolithic Architecture; concurrently delivered a \$10M/day cloud inventory platform.

- **Cut infrastructure cost 35%** via serverless adoption and right-sizing while sustaining a 99.9% uptime SLA across 500K+ daily transactions—freeing budget for product investment.
- **Avoided premature-microservices tax.** Selected modular monolith over distributed decomposition, balancing team capacity against long-term maintainability and avoiding the operational cost typically incurred by mid-sized teams shipping prematurely distributed systems.
- **Tripled deployment frequency** by leading legacy-to-modular migration and enabling independent team ownership.
- **Improved working capital** on the inventory platform: automated reordering cut stockouts 60% and excess inventory 25%; integrations with 5 vendor APIs used graceful degradation to protect transaction flow.

Rocket Homes — Engineering Team Leader · Detroit, MI

Jul 2021 – Dec 2023

Led a 6-engineer team replacing legacy point-to-point integration with an event-driven platform.

- **Raised availability from 95% to 99.8%**—materially reducing revenue exposure to platform incidents—via circuit breakers, retry logic, and health monitoring.
- **Decoupled tightly-coupled services 80%** with an Apache Kafka backbone processing 100K+ events daily at sub-50ms latency, eliminating cascading failure modes.
- **Doubled feature-delivery throughput** through modularity and team autonomy.
- **Established distributed-systems practice:** mentored 15+ engineers on event sourcing and CQRS; standards adopted by 8 development teams. The same decomposition discipline now informs my multi-agent AI architecture work.

Rocket Mortgage — Team Leader, Developer Relations · Detroit, MI

Aug 2019 – Jul 2021

Built the Developer Relations function from scratch for a 200+ engineer organization.

- **Cut new-engineer ramp 42%** (6 → 3.5 weeks) by launching internal developer portal and tooling, materially expanding effective engineering capacity.
- **Resolved top-5 workflow friction points** using developer experience metrics, reducing per-engineer time lost to tooling drag.
- **Generated 500K+ technical impressions** through 70+ workshops, posts, and videos, and established 10+ open-source partnerships across 25+ repositories—reinforcing engineering brand and recruiting funnel.

JetBrains — Developer Advocate · Prague, Czech Republic

Aug 2017 – Aug 2019

Drove .NET tool adoption across the North American developer community.

- **Increased ReSharper / Rider adoption 25%** in target segments through direct technical engagement: 50+ conference presentations to 5,000+ developers annually, with demonstration content viewed 1M+ times.
- **Influenced product roadmap** by collecting and prioritizing structured feedback from 500+ developers across the .NET ecosystem.

EARLIER CAREER & ENTERPRISE CONSULTING

- **Enterprise Architecture Consulting (2008–Present).** Custom enterprise solutions for Microsoft, MLB Advanced Media, and 10+ Fortune 500 clients—including web applications serving 1M+ concurrent users at 99.99% availability and microservices processing 50M+ daily requests.
- **Eidex — Principal Architect (2016–2017).** Led a 10-developer team delivering a React / ASP.NET Core analytics platform serving 1,500+ K-12 school districts; cut deployment time 94% (4 hr → 15 min) via Jenkins CI/CD.
- **Grand Circus Bootcamp Partnership.** Designed and delivered an 8-week intensive software engineering program; 80% job placement within 90 days; curriculum adopted by 3 Michigan bootcamps.
- **National Heritage Academies.** Contributed to a 13-engineer team delivering a school-management platform serving 93 charter schools, 9 states, and 50,000+ daily active users.

INDUSTRY RECOGNITION & THOUGHT LEADERSHIP

- **Microsoft MVP**, Web Development & .NET/C# (2008–2014, 2025–Present) · **.NET Foundation** Board Member & Director (2024–Present) · **PASS** Board Member (2017–2019) · **AWS** Community Builder (2019–2021) · **JetBrains** Community Contributor (2020–Present)
- **Co-author**, *Developer Relations Activity Patterns* (Apress, with Ted Neward, Scott T. McAllister, and David Neal). **Host**, *The Breakpoint Show*; previously *Deep Fried Bytes Podcast* (2008–2014, 200+ episodes, top-10 software development podcast).
- **International speaking circuit:** Microsoft TechEd, QCon San Francisco, Visual Studio Live, NDC Oslo & London, CodeMash, DevSum Stockholm, Update Conference Prague, ConFoo Montreal, KCDC, and 20+ additional venues.

EDUCATION

B.S., Computer Science — Michigan State University, East Lansing, MI

TECHNICAL EXPERTISE

Languages · C# · TypeScript · JavaScript · Python · SQL / T-SQL · PowerShell · Bash

Frameworks · .NET / .NET Core / .NET 5+ · ASP.NET Core · Entity Framework Core · Dapper · React · Angular · Vue.js · htmx

Cloud & Infra · Microsoft Azure · AWS · Google Cloud Platform · Kubernetes · Docker · Terraform

Data & Messaging · SQL Server · PostgreSQL · CosmosDB · MongoDB · Redis · Apache Kafka · Azure Service Bus · gRPC · REST · GraphQL

DevOps · Azure DevOps · GitHub Actions · Jenkins · IaC · Observability

Agentic AI · Agent specification · multi-agent orchestration · eval harness design · guardrail engineering · token economics · agent context architecture

AI Tooling · Claude Code · Cursor · Windsurf · GitHub Copilot · Microsoft Copilot
